BusinessCharts
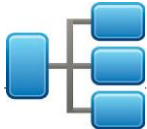

Select Data, Go Charting!

Select an Appian application, select a data entity, select the fields – Go Charting!

Multi-Level Drilldowns

Pie-chart on Field1, Column-chart on Field2. Again, Pie-chart on Field3. Powerful, multi-level drilldowns!

Powerful Charting Framework

BusinessCharts is powered by a comprehensive reporting and charting framework in the back-end.

Persistent Systems' BusinessCharts Solution enables business users to dynamically create grids and charts from desired data.

Business users can select an Application, then select a data entity from that application, and start creating dynamic charts based on the fields in that data entity. "Pie-chart on Field1, then Column-chart on Field 2.." Select Data, Go Charting - As simple as that!

Persistent's BusinessCharts Solution enables Business Users to create multi-level drillable charts, on any Appian data entity from any Application

Configure and Save

Once a chart is configured, it can be saved – so the chart can be run anytime needed, and would present data as on runtime.

Export and Download

Chart configurations can be run at any point in time, and the generated charts can be exported into Microsoft Excel

Share the Charts

The generated charts can be shared with managers / other users via E-Mail.
